Where We Come From:

The Region of Päijät-Häme and Lahti

Lahti, the center of the region, has 120 000 inhabitants, being the 8th biggest city in Finland.

The Päijät-Häme Region has appr. 200 000 inhabitants.

We have a long history in cleantech, design and well-being.

We are the gate to the Lake Region!

Finland is the world's...

Best in press freedom (Reporters without borders, World Press Freedom index 2015)

Least fragile state (Fund for Peace, Fragile States Index 2014)

Best in wireless networks per capita (OECD, Broadband Portal 2014)

Second best place to be a mother (Save the Children, State of the World's Mothers Report 2015)

Second best in gender equality (World Economic Forum, Global Gender Gap Report 2014)

Third least corrupt country (Transparency International, Corruption Perceptions Index 2014)

Fourth most competitive country (World Economic Forum, Global Competitiveness Report 2014)

Fifth best in education (Economist Intelligence Unit for Pearson 2014)

Sixth happiest country (Sustainable Development Solutions Network, World Happiness Report 2015)

Best country (Newsweek 2010)

WELCOME TO

Business

LAHTI REGION

A WORLD CLASS ENVIRONMENT FOR CLEANTECH BUSINESS

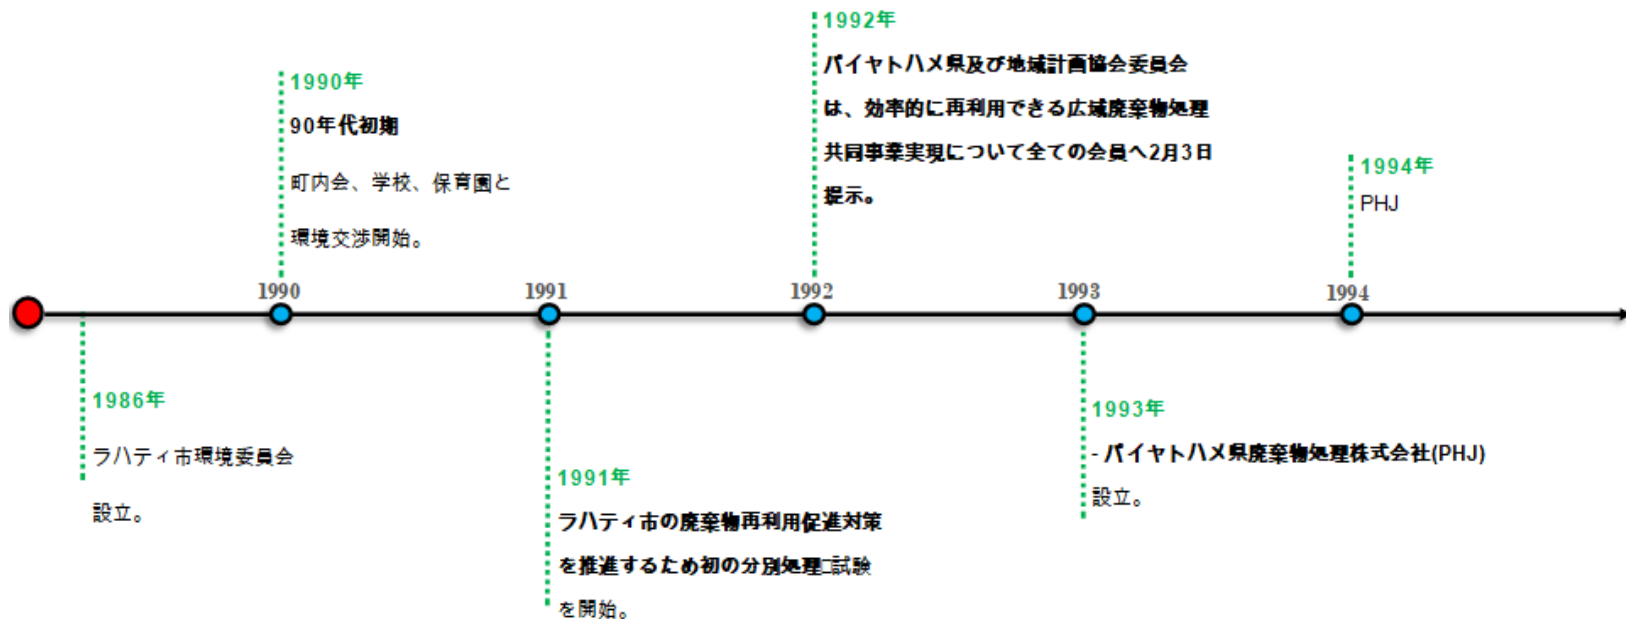

- FORERUNNER IN WASTE MANAGEMENT AND MATERIAL EFFICIENCY.
- INTERNATIONALLY RENOWNED EXPERTISE IN WATER AND SOIL PURIFICATION.
- GROWTH COMPANIES AND TOP CLASS R&D INFRASTRUCTURE IN RENEWABLE ENERGY AND ENERGY EFFICIENCY.
- INTERNATIONAL MEETING PLACE FOR CLEANTECH INVESTORS AND GROWTH COMPANIES.

EVERYTHING BEGAN WITH LAKE VESIJÄRVI

1995 - 2016

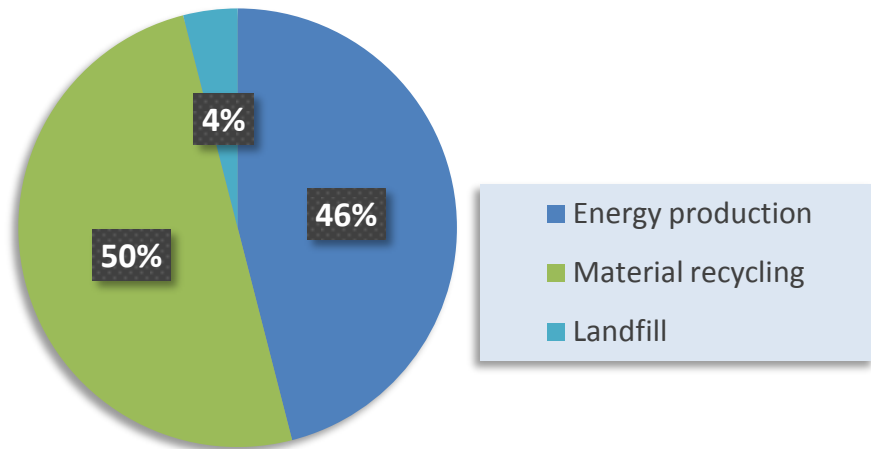

Waste utilisation 2016

- Energy waste to Kymijärvi II –gasification plant.
- Mixed waste to incineration plants Kotka Energia and Ekokem.

Goal 2020

- Better separation of waste in the collection bins is required to achieve the goal.

How to reach the 50% recycling rate

A) More efficient sorting in households

- Advising people to separate their waste in the collection bins
- By tightening waste management regulations

B) Developing mechanical separation system at Kujala Waste Centre

- New technology implemented in late 2016 to enable better utilisation of different waste
- Metal, plastic, wood and energy waste separated from mixed waste and construction waste
- Plastic and carton separated from energy waste

Circular economy and waste management

Kujala Waste Centre- Industrial Symbiosis Lahti, Finland

Viljaperäiset sivuvirrat - Teolliset Symbioosit Lahti

Case: Etanolix™ Lahti

- 2005-06 side products of Lahti Grain Cluster companies were studied
- 2010 started bioethanol plant of ST1 Oy (5th unit)
- Feedstock from Hartwall brewery
 - Excess yeast that contains alcohol
 - Process waters and product batches containing sugar or alcohol
- Side products from bakery industry and markets
- Integrated into Hartwall's brewery and beverage plant

Animation of Bioethanol production:

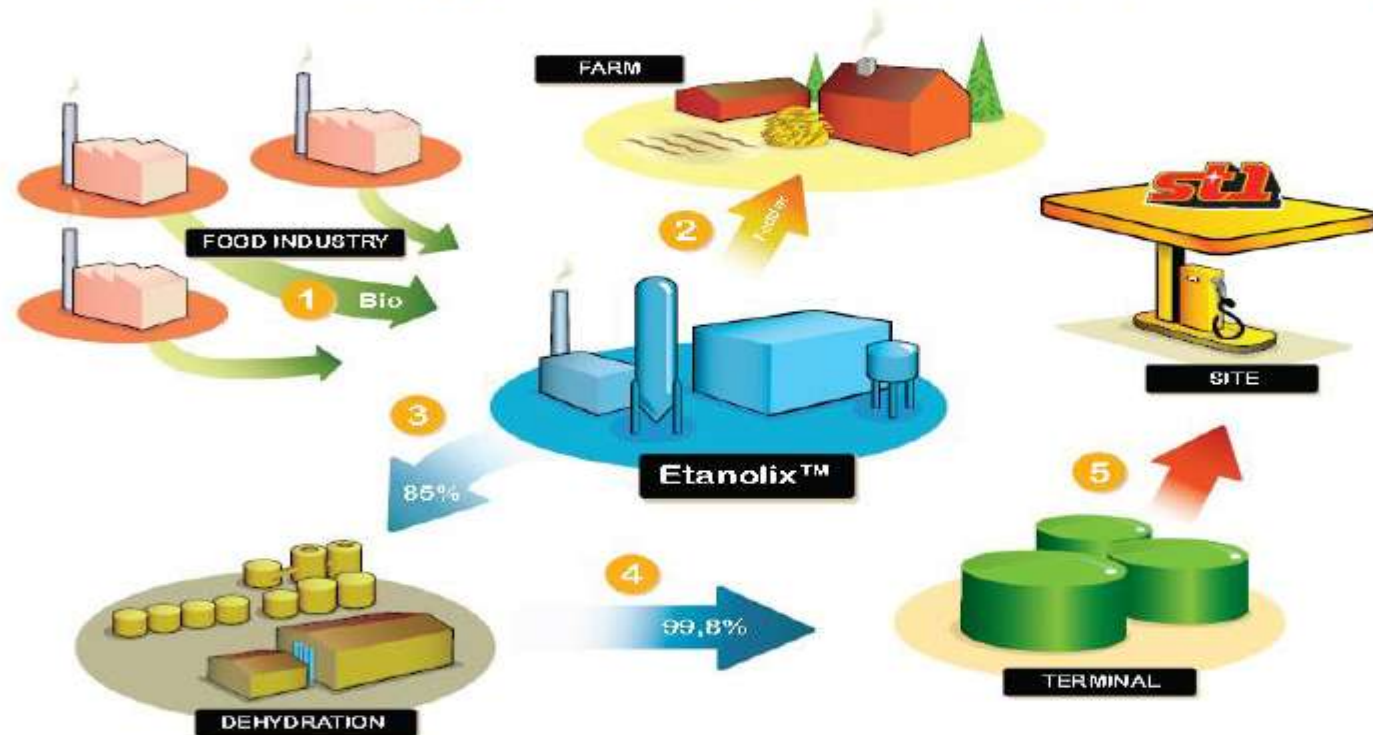

<https://www.youtube.com/watch?v=kqfW0VmONXc>

ST1 Oy Etanolix™-process

Distributed bio-ethanol production

St1 Oy, Finnish energy company, develops and commercializes environmentally sustainable solutions and delivers these solutions profitably

1 CO₂ Good bioethanol is produced from waste material - and industrial by-products - using Etanolix™ processing plants

2 This process creates a by-product in itself which can be used as animal feed for farmers

3 The 85% bioethanol produced is then sent for dehydration to remove water and make it suitable as fuel component

4 Then the bioethanol is blended - as a bio component - to make final fuel blend

5 Biofuel is ready for distribution to service stations

Thank you!
