Lahti University of Applied Sciences - Ishizaka co-operation seminar 7th of November, 2017

A key player in environmental education and expertise
From the great history to an even brighter future

Connections with companies
- Companies located at the campus enhance efficient student interaction with working life. Currently there are approximately 70 companies at the NiemiCampus, unique solution attracts more and more companies.

Modern spaces and facilities
- Modern spaces and modern educational technologies

Unity
- All faculties will be functioning under the same roof, which strengthens unity and fellowship

Multidisciplinary and multiactor
- Cooperation between Lahti UAS faculties and with the University of Helsinki and Lappeenranta University of Technology

Campus Furniture Projects: an example of a company project

**WHO?** Students from Furniture Design / Lahti UAS Institute of Design

**WHAT?** New concepts and furnitures for all the spaces at the new campus

**HOW?** Long term students driven design handpicked ones manufactured by Isku-Group

**WHY?** Need for new solutions for the learning environments and showing the know-how of the students at the new campus

**WHAT ELSE?** New products for the open markets, success stories for the students
• How “Not In My Neighborhood” turned to “Be In My Neighborhood”

• Ishizaka’s operational model: one price to all customers big or small

• staff training & capacity building
• Co-operation and co-development of Lahti City & Lahti University of Applied Sciences & Lahti Region & Local Companies in environmental education research & development & innovations - business
• Ishizaka as a waste management company knows Asian market, legislation and has unique model to provide

• Lahti UAS as a university has expertise in co-development of new solutions, education and research process
Education for sustainable development

- Students learn sustainability in practice when doing projects to companies, to Lahti City or working in external funded development projects
- Students
  - develop new solutions
  - create new business ideas
  - communicate with residents
  - make information visual and easy to understand
- Sustainability education is integrated into professional studies
- This approach gives an opportunity to co-operation

Sustainable food systems as a part of bio circular economy

Towards energy self-sufficiency by sustainable transport and energy solutions

Shared economy generates new consumption models and business opportunities

Piloting and demonstrating innovative circular economy solutions

Closed loops of technical streams to create added value

Actions

- Creation of digital platforms to optimise logistics related to re-use of company side streams
- Material collection pilots for the construction and other sectors
- Establishment of a Circular Material Library to promote circular economy through product design and new industrial symbiosis
- Producers: cities / municipalities
- About 75,000 metric tons / year
- Approximately 55% is reused
- For land construction
- As fertilizer (about 1000 metric tons)
- New opportunities: road construction, soil and treatment methods, digitalization
New Lahti UAS. New Campus. 2018

Campus meets Factory = Unique Future Learning Environment
Thank you!

Wellcome to Lahti!

Silja Kostia, Dean, Faculty of Technology
